From outsourcing to a source of innovation

The emergence of India as a formidable economic powerhouse is a topic that TV pundits around the world just can’t seem to get enough of. Behind all of the broad claims and sweeping statements, there is actually much truth — India is indeed gaining speed.

Encore! Encore!!

The story of India’s ongoing transformation from a hot spot for outsourcing to a source of world-class innovation is made up of characters like Vinay Deopatil, chairman and CEO of Encore Software, a Bengaluru-based high-tech D&I company, and one of the most respected names in the global outsourcing fraternity.

Deopatil has been a pioneer in the flourishing Indian software industry. He has been associated with the industry since the early 1990s, led some of the most high-profile deals, and has witnessed the growth of the Indian IT services sector from its infancy to its current state. His journey is a testament to the hard work and dedication of the Indian software industry.

Deopatil is known for his passion and affordability of Indian talent. He is an expert in introducing strategic and innovative technology that shows that India Inc. can do far more than undertake others’ projects. “Every company that I have

Software firm expands to Japan and other new markets

R Systems, one of India’s leading providers of outsourced product development services, is extremely bullish about its future, having experienced in the past few years rapid growth that has contributed to its success and reputation. The company’s chairman and CEO calls merely “the tip of the iceberg.”

Having scored early successes with companies in the U.S. and Europe, R Systems is now expanding its overseas markets and stepping up its operations in Japan. From its Singapore office, R Systems already serves Japanese global giants such as Sharp, Hitachi, and Mitsubishi Electric.

Company Chief Rolledin Singh states: “Japan’s IT service is very in line with other countries in terms of what they sell and what they do. However, the Japanese market is different, and it takes a different approach. R Systems can now be a part of this market and offer our services to Japanese companies.”

R Systems has made significant strides in the Japanese market. In March 2006, the company strengthened its infrastructure to meet the emerging demands and accommodate the forecasted expansion in the U.S. and Japan. As part of its continuing commitment to improve customer service and build up its business, R Systems has also received international recognition.

R Systems is committed to offering superior services and solutions to Japanese companies. The company is confident that its expertise and experience will lead to success in the Japanese market. The company’s focus on achieving excellence and providing high-quality services is expected to help it achieve its goals in Japan.

As a result, R Systems is looking to expand its business in Japan and other countries, focusing on delivering superior services and solutions to customers.

Global steel pioneers with Japan in mind

The Ajmera Group, a construction and real estate development company in India, entered the cement and steel industries more than a decade ago to boost growth through complementary businesses and contribute to the country’s economic development through the vision of Group Chairman and Managing Director C.S. Ajmera.

“While it was never too late to enter the steel business, we realized that it was the right time for us to go into cement,” Ajmera told Metalocus. “This was a period when the construction sector was on the rise and there was a rush forutea products. This was the right time for the Ajmera Group to enter the cement and steel industries.”

While the company’s steel plant is in the southern state of Karnataka, it has also been involved in the cement industry in the northern state of Uttar Pradesh. The group has a 60% stake in the Greenary Cement plant, which is located near the steel plant in Karnataka.

Innovation was once the domain of Japanese companies. However, today, Indian companies are making significant strides in innovation. Staffed with a high number of employees with international experience, Bengaluru-based biotech company Jubilant Biosys has numerous Indian companies, like Jubilant Biosys, are now breaking into global markets with innovative products and solutions. For example, Jubilant Biosys is a global pharma company that provides services across the entire drug development life cycle, from R&D to manufacturing and commercialization.

Innovation has been a key factor in the growth of the Indian automotive industry. The country has a large and growing domestic market, which has encouraged many companies to develop and manufacture their own models. For example, Honda Siel Cars India, a subsidiary of Honda Motor Company, has been successful in the Indian market with its popular Civic model.

In today’s India, lower- and middle-income nationals who have come to partake of the countless opportunities this bountiful land offers.

Today’s India is God’s country and is thus intimately involved in the welfare of India’s burgeoning lower-middle-class families. It has traditionally provided them a system based on empathy and customer service.

The hotel is considered to be the premier hotel of the city of Bengaluru, the IT capital of India, where royalty and celebrities come to and rub shoulders. Complete state-of-the-art luxurious amenities and services, like 24-hour room service and a car service, make the hotel a luxurious choice for the business traveler.

Indian IT know-how is making a real impact in the U.S. and Japan. It is teaching them the value of accountability and customer service excellence. This is relatively new, but Indian companies are making the most of it and are showing the world the potential of this extraordinary country.

By sharing the Indian culture and customs with our Japanese colleagues, we are helping them to understand our way of doing business. This is the key to successful business negotiations.

In India, the government has been encouraging the development of small and medium enterprises (SMEs) to boost the country’s economy. SMEs play a vital role in the Indian economy, providing employment opportunities, promoting innovation, and contributing to the country’s GDP. The government has launched various schemes and programs to support SMEs, including tax incentives, access to finance, and business development services. These initiatives have been instrumental in driving the growth of SMEs in India. However, challenges such as limited access to finance, lack of skilled labor, and inadequate infrastructure continue to pose challenges for SMEs in India. Despite these challenges, India’s SMEs are making significant contributions to the country’s economic growth.
