Stronger partnerships in Asia

As Japan has emerged from the 1950s economic stagnation to the present digital age, the JFC Group has strengthened its relationships with the Asian community. JFC’s ability to understand and meet the needs of the Asian community has enabled us to expand our global business.

Makoto Yamanaka, Japan’s consul general in San Francisco, says, “Just as the green movement gains more momentum in Japan, Silicon Valley is doing its part in energy-efficient performance.”

Keeping up with the growing popularity of Asian cuisine

Asian food has ceased to become so exotic in many cities with a long history of Asian influence. As Asian cuisine spreads, many trends and influential names in the business.

JFC International, based in San Francisco, has experienced robust growth over the past few years. “We’ve continued to meet the demand for Asian foods across the U.S.,” says JFC’s Sales Manager, Charles Liang. “We’ve expanded our product range and strengthened our brand recognition.”

Banking on high quality and green solutions

When Charles Liang first thought of setting up a computer hardware company in San Jose, California, in the early 1990s, most of the computer products were not as sophisticated as they are now. Fourteen years have passed, and Liang is very pleased with his company’s growth, especially its reputation for designing and producing innovative, high-quality products.

When Huang founded Supermicro in 1993, he saw a shift in the market, and a growing demand for servers with better system architectures and lower power consumption. "Our business climate has changed in this area," says Huang. "Customers are now very concerned about the environment and the cost of running a business." Supermicro has responded to this challenge by developing innovative products that are energy-efficient and environmentally friendly.

From Silicon Valley to the world

In line with the goal to stay ahead of competitors, Japan-based IT giant Fujitsu has developed a number of innovative products. These products are developed here in Silicon Valley and are exported all over the world.

Toshiba Matsuda, president and CEO of Fujitsu Computer Products of America, says, “We decided to car...
