Building a resilient Czech economy for the future of Europe
Interview with H.E. Tetsuo Yamakawa, Ambassador of Japan to the Czech Republic

In the light of the Year of Friendship between Japan and the Visegrad Group, how would you characterize the relationship between the Czech Republic and Japan today?

Interview with H.E. Tetsuo Yamakawa, Ambassador of Japan to the Czech Republic

We have traditionally been very good at attracting Japanese investment into the country.

The Czech Republic is located at the very heart of Europe. The country offers investors close proximity to leading Western European economies while providing access to production and consumption economies in the east. Located at the crossroads of Europe, the country has excellent infrastructure and transportation networks.

The Czech Republic’s highly skilled labor force has enabled it to position itself as a leader in the region. Czechs are known as great craftsmen and engineers; in fact, “Zlaté české ručičky (Czech Golden Hands)” is a golden hand in the region. Czechs are also known for their craftsmanship and high-quality products.

The Czech Republic’s location and infrastructure provide a strategic position for investors. The country is well-connected to major European cities and has excellent air, rail, and road networks.

Outsourcing document processing is key to increased competitiveness
