Japan and the Netherlands – A deep-rooted friendship

I
n 1609, the Dutch and Japan- ese entered into a formal trade treaty. Since then, both nations have maintained a strong trading relationship, with the Netherlands being the first Western country to establish diplomatic relations with Japan in 1824. The current ambassador to Japan, Ria Van der Velden, mentioned in her speech at the Japan Times that the Netherlands has a long history of trade and cultural exchange with Japan.

Eagle Holding Europe – Driven by Success

S
eguring atmosphere from contracting hand to hand, the deal is a critical part of our company’s future. EKK Eagle Industry Co., Ltd. (Japan) and Teijin Aramid Europe (Netherlands) have concluded a contract to cooperate in the manufacturing of mechanical components for the automotive industry.

Teijin Aramid – Building on a Solid Customer Base

A
ramid fibers are a class of high-performance fibers for structural applications. With a unique chemical structure, its fibrous material can withstand temperatures of up to 450 degrees Celsius. As a part of Teijin's global footprint, Teijin Aramid has several facilities across Europe, including its headquarters in the Netherlands.

Omori Europe: Creating a Successful Dutch-Japanese Partnership

T
he Netherlands-based company, Omori Europe, has successfully established a strong presence in the European market by building a successful partnership with Japanese companies. The company’s managing director, Hiroshi Inomata, emphasizes the importance of a strong local presence and the benefits of combining global expertise with local knowledge.

Eggstraordinary growth

B
ooking.com has grown to become one of the largest travel booking platforms in the world. The company’s success can be attributed to its innovative technology and user-friendly experience.

Omotenashi, the Japanese hospitality principle, is a key aspect of Booking.com’s success. The company’s commitment to providing exceptional service has led to a strong reputation in the tourism industry.
Kisuma Chemicals B.V. is one of Europe’s leading producers of magnesium hydroxide and the world’s largest producer of synthetic hydroxides. The company’s pure synthetic magnesium compounds are used as acid scavengers, and halogen-free flame retardants by polymer production and the global processing, construction, transportation, mining, telecommunications technology industries. Kisuma Chemicals is building an repuation as a leader within Europe’s chemical industry through its services, products and customer-focused approach.

Through the support of our parent company, Kyowa Chemical Industries, a leading magnesium source in Veendam, the Netherlands, Kisuma has evolved into a leading technology company with a trusted approach to client needs.”

Kisuma Chemicals shows the way to a sustainable future

Satosi Europe GmbH Benelux, the regional office of SATO with its base in Breda, the Netherlands, provides solutions for track and trace integration in companies in Europe with auto-ID devices, including labels, barcode printing, RFID and more. SATO uses electromagnetic fields to automatically identify and trace tags attached to products, including labels, tracking and asset management.

The “internet of things” model combined with data protection and privacy concerns are driving innovation and the company’s “internet of things” for benefits such as labor savings and improved patient comfort.”

SATO in Benelux – On Track for Success
