Look East Policy 2.0 brings Malaysia and Japan together

Mitsui's philosophy is to become a global resource and continue to provide high-quality and cost-effective solutions to our customers at every step. "We are on track to hit our sales target and are looking forward to continuing to serve our clients in the future," said Ryuta.

Strengthening partnerships and creating value

With the Look East Policy, we are able to provide more opportunities for cooperation between Japan and Malaysia. The policy is aimed at encouraging companies to invest in Malaysia and strengthen our relationship. "We are happy to continue working with our local partners in Malaysia and look forward to the future," said Yasuda.

Looking ahead to the future

As the look East Policy continues to develop, we expect to see a stronger relationship between Japan and Malaysia. "We are committed to continuing our partnership with Malaysia and look forward to the future," said Ryuta.

Makio Miyagawa, Ambassador of Japan to Malaysia

The Look East Policy is an important initiative that will help to strengthen the relationship between Japan and Malaysia. By providing access to Japanese capital and strengthening the country's ties to Japan, the policy is expected to play a key role in Malaysia's economic development. "The new administration has strengthened the country's ties to Japan and there is a positive trend in investment opportunities," said Miyagawa. "We are committed to working with Malaysia to contribute to its economic growth."
Addressing the palm oil sustainability challenge

Malaysia

A

F

As a row crop suited to cultivation in climatic conditions similar to those of Malaysia, which is one of the planet's most suitable areas for palm oil production, the country produced 19.5 million tonnes of palm oil in 2015, annual palm oil production has increased steeply. By 2050, production is expected to reach 54 million metric tons. Malaysia is a country with an abundance of palm oil cultivation areas, and its palm oil production has increased gradually and spread to various regions, such as Peninsular Malaysia, Sabah, Sarawak, and the Brunei region. The company’s contribution to sustainable palm oil production is significant.

Mitsubishi Corporation: Contributing to Malaysia’s Sustainable Development

Malaysia’s palm oil fruits are precious, and they hold the key to sustainable development and future generations. Palm oil products contain palm oil derivatives. The food and consumer industries account for two-thirds of palm oil production, while manufacturing and textile industries account for one-third.

LOVE MY PALM OIL
A Palm Oil Producer

A rich history

A "The palm oil industry is the backbone of Malaysia’s economy. Areas of business include construction and infrastructure, investment management, manufacturing, and logistics. In the past decade, Malaysian palm oil production has quadrupled. By 2050, production is expected to reach 240 million metric tons.

Biodiversity Centre (SBC) are two examples of Mitsubishi KL’s commitment to delivering sustainable projects while contributing to the country and the region.

GENNOSHI CHIKAMARU
Chairman

Mitsubishi Kuala Lumpur

"In Malaysia, I enjoy talking to people and learning of their dreams for the future of their country, said Ichikawa. "We want to continue to support Malaysia and appreciate the fact that the people love their country. Mitsubishi KL is here to move forward together with Malaysia," said Ichikawa. "We want to continue to support Malaysia and appreciate the fact that the people love their country.

Mitsubishi Corporation: Contributing to positive change in Malaysia

Mitsubishi Corporation is committed to educating and assisting local communities in the areas where it operates. "Our hope is that we can play a role in the conservation of knowledge and human resources in Malaysia and Singapore," said Ichikawa.

Baking in the sun

The Malaysian palm oil industry is the leading source of income for Malaysia. However, the industry faces challenges such as deforestation, biodiversity loss, and consumer concerns about sustainability. Mitsubishi Corporation is committed to addressing these challenges and contributing to the sustainable development of the country.

Mitsubishi KL is here to move forward together with Malaysia, and its commitment to sustainability is evident in its efforts to promote sustainable practices and support the industry. Mitsubishi KL is committed to contributing to the sustainable development and future of Malaysia.
