An ‘exceptional partnership’

F

n the following the successful 2020 Tokyo Olympic and Paralympic Games, Paris is getting ready to welcome the world in 2024. France and Japan are working together to create a gold medal for their ability to organize the Olympic and Paralympic Games, said Tony Estanguet, president of the Paris 2024 Organising Committee. “We are humbled by the heart and dedication of our Japanese colleagues put into organizing these Games in the face of a challenging circumstances. We are very thankful for their welcome and openness in sharing their experiences with us. In the same spirit of friendship, that unites our two countries and we are now looking forward in the Paris 2024 Games.”

People cheer while working French ‘trottoir’ flags near the Eiffel Tower on the Champ de Mars in Paris.

Tony Estanguet, president of the Paris 2024 Organising Committee, spoke with Kentaro Yoshida, country general manager of bioMérieux in Japan, in Paris last month. “When we look to the future, Japan and France are facing, including climate change and aging society, the same issues we are facing, including climate change and aging society,” said Yoshida.

In the numerous issues we face today, the most important factor is the dialogue of exchange. “As a French initiative, CEFJ also celebrates 25 years next year and we will continue these stimulating exchanges between both countries and the dialogue is required. The need to recognize is the French-Japanese intellectual desire to interact across borders and the world,” said Yoshida.

Jutsumi Ito, Ambassador of Japan to France

In conclusion, the company also is active in research and development of intralocular lenses. Represented in over 80 countries, Menicon SAS in France is the oldest subsidiary/branch outside of Japan and the French market is key to the company’s success in Europe. Atralas Ichimura, the founder of Menicon, has been a long history in approximately 45 minutes.

What does the future hold for bioMérieux?

The company is focused on its ability to deliver more rapid and reliable results for wider disease coverage. For the industrial market, we are playing an important role in development and detecting microorganisms and detecting microorganisms in food, pharmaceutical and agricultural markets.

The company’s focus is on development and detecting microorganisms and detecting microorganisms in food, pharmaceutical and agricultural markets.
