Message from the Prime Minister

I have heard many times that our friendship is a treasure and a source of pride for the people in our nation and it can be seen from the relationship we share with Australia. As a Japanese nation, we have a long tradition of working together on a wide range of issues that are of mutual interest. In this regard, we have been able to make progress in areas such as trade, investment, and our shared commitment to sustainability.

For our joint future, we should focus on the following three areas:

1. Trade and Investment: We should continue to strengthen our economic partnership by promoting trade and investment between Japan and Australia. This includes promoting investment in new industries, such as renewable energy, and increasing trade in goods and services.

2. Climate Change: We should work together to address the global challenge of climate change. This includes promoting the use of clean energy and reducing greenhouse gas emissions.

3. Regional Stability: We should work together to promote regional stability and security, including through the Asia-Pacific Economic Cooperation (APEC) forum.

In conclusion, I believe that our friendship is one of the most important relationships in the world and I look forward to working with you to build a brighter future for our nations.

Olympus Australia: ‘True to Life’

Knaven, globally as a leading manufacturer of optical and digital precision technology, Olympus is focused on innovative solutions that deliver the best outcomes for patients. The company is committed to its partnership with Australia as a key player in the Asia-Pacific region.

My customers often refer to us as a company with a high integrity, a trusted presence and a firm commitment to doing what is right. We are a part of the global Olympus culture and work hard to ensure that our customers are satisfied with the products and services we offer.

I acknowledge the visionary leadership that has driven the company to its current position. In particular, I want to thank my predecessor, Shingo Yamagami, for his dedication to our company and his commitment to driving Olympus forward. His legacy will continue to shape our future.

Olympus Continuum platform.

In summary, we are excited to be expanding our presence in Australia and look forward to working with our partners to deliver the best outcomes for patients and customers.

Fujitsu: Creating a more sustainable world by building trust through innovation

Since its foundation in 1962, Fujitsu has been a leader in the field of information technology, providing innovative solutions to our customers around the world. In Japan, the company has been committed to promoting sustainability and has made significant contributions to the country’s economic development.

Fujitsu has been a driving force in the development of renewable energy and has been involved in various projects, including the construction of wind farms and solar power plants. The company has also been active in promoting energy efficiency, with a focus on reducing energy consumption and carbon emissions.

Today, Fujitsu is committed to taking a leading role in the development of sustainable solutions, with a focus on reducing carbon emissions and promoting renewable energy. The company has set a target of reducing its carbon footprint by 20% by 2025, and has invested heavily in research and development to achieve this goal.

Cleaner energy for Japan

Woodside Energy has supported the successful launch of Woodside Energy in Japan for its 30th anniversary festivities. The company has a long history of collaboration with Japan, and the launch represents a new chapter in our relationship.

Woodside Energy is a leading player in the global LNG market, and has been working closely with our Japanese partners to develop new opportunities in Japan. The company has a strong track record in the region, and has been involved in various projects, including the construction of LNG terminals and the supply of LNG to Japan.

The company’s focus on cleaner energy is aligned with the goals of the Paris Agreement, and we are committed to reducing our carbon footprint and promoting renewable energy. We are excited to continue our collaboration with our Japanese partners to drive progress in this area.

We should be very proud of what we have achieved over the past seven decades. Our cooperation over the years has laid the building blocks for the strategic partnership we share today.

Australian businesses and government leaders have been working together to promote cooperation and investment in the region,
