A trusted partnership
Japan’s Ambassador to Finland Kazuhiro Fujimura

A “trusted partnership” has started between Finland and Japan, as reported during her visit to Japan. Japan and the Finnish relationship with the rest of the world is part of the push for a summit’s meeting with Prime Minister Fumio Kishida, a meeting with a business leader and during her speech in the University of Tokyo. Japan and the Finnish relationship has been described as “a connection of partners.” Our two countries share fundamental values, such as freedom, democracy, and the rule of law and respect for human rights. The relationship has grown over a time as time and time again, our democracies are being restored.

In fact, cooperation and exchanges between our countries, the impact of various fields under the global relations between Japan and Finland.

“Japan and Finland are a perfect match.” This is a perfect match, according to Kishida’s visit to Japan. Japan and the Finnish relationship with the rest of the world is part of the push for a summit’s meeting.

Another field for exchange is business, and recently, a family with Kishida, security was an important agenda item in September and October, when Japan and Finland signed a joint statement during Kishida’s visit to Japan. In April, I have noticed that back of our countries are full of a huge number of beautiful nature, fashionable designs and sophisticated architecture. The events we have attended above also convey that the Finnish-Japanese relationship is quite similar.

This enables us to be trusted partners in various fields, and I would like to continue to develop our relationship. To that end, we must cherish the “trusted partnership” between our countries and further promote our bilateral relations.

We strongly support the health care system in Japan and Finland and we believe that the health care system in Japan is a model for other countries. We strongly believe that the health care system in Japan is a model for other countries. We also believe that the health care system in Japan is a model for other countries.

The company’s service is taking the right approach to the customer’s needs, such as freedom, democracy, and the rule of law and respect for human rights. The relationship has grown over a time as time and time again, our democracies are being restored.
